COURSE CONTENTS:
• Safety Management Systems
• Accident Prevention Techniques
• Safety at Workplace
• Occupational Health & Hazards
• Project Report
Eligibility: Graduation (any stream) or equivalent
Duration: 1 Year

Why has a career in safety become such an attractive option ?

There are three important reasons for this
1. This is because of the governmental rules implemented for making safety strict in establishments. The recent adoption of constructional Safety Act by parliament has made appointment of safety officers compulsory at all construction sites. As a result a flood gate of opportunities is opening up in India. Abroad, especially in the Gulf safety is a very strict norm. As a result they require thousands of people there as safety officers.
2. It is a highly paid job. In India the start salary is in the range of **15000/- to 20000/-** per month. Abroad it is in the range of **Rs.65000/- to Rs.80000/-**
3. It is a job with high status. A safety officer is a highly respected person in his office. He works with dignity and it is always a management position.

Is it possible to get such salaries as a fresher?

The salary (you can draw in any field) and the experience (you require to get that salary) in any career greatly depends on the demand & supply gap. There is a huge shortage of trained hands in this field. The booming constructional industry becoming strict with statutory safety rules and norms and acute shortage of trained hands in constructional safety is widening the gap between demand and supply , making it possible for anyone with knowledge in the field from a reputed organization, to latch on to huge salaries and good designations in safety.

What are the opportunities in this field?

This course could mould you into an excellent • Safety Officer • Safety Supervisor • Safety Warden • Safety Checker • Safety Instructor • Safety Auditor • Safety-in Charge • HSE assistant • Safety Engineers • HSE officers • Design Engineer fire protection • Estimation Engineer Fire protection • Fire Alarm Technician • Industrial protection technician

Most often a career in Industrial and safety is misunderstood as a career in fire fighting. Being the leading University of it's kind ,ARUNACHAL UNIVERSITY OF STUDIES has understood the job market in this field through feedback from it's huge student databank serving various posts in Safety at reputed organizations across the country and gulf, through the feedback from its placement team operating nationally and the recruiters constantly targeting it's campus for new recruits . The market is distributed • 80% in safety jobs • 10-15% Industrial engineering jobs • 5% with Industrial fighting jobs.

What is the job of a safety officer?

Ensure the safety of the employees by making them aware of the possible accidents through educative seminars. Make them aware of the usage of various safety gadgets through demonstrative sessions. Making them alert of accidents through safety posters etc. Ensuring that the measures are put into practice by the employees. In short, his job is to ensure that employee gets back home with 10 fingers on his hands and toes. His job is to educate them on the Do's and Don'ts at the workplace. His job is to manage them and supervise them. He has nothing to do with fire or fire fighting especially if his job is in construction sector.

Whether Practical Training will be given to Candidates or not?

Yes Practical Training will be given as per the Industry Standards for regular candidates. Considerable importance is given to hands-on training in this program. Candidates need to do **'On the Job Training'** in various companies for which study center helps the candidates so that their placements can be done appropriately after completion of the course with Practical Training exposure.

About University Examinations?
Examination centers are allotted all over India especially in Metro Cities i.e Delhi, Mumbai, Punjab, West Bengal, Himachal, Gujarat, Lucknow,Haryana, Rajasthan, South India   and many other places & keeps on adding up as per the Enrollment of the Candidates.
